

# Liezen Environmental Sustainability Policy

# **Energy Efficiency:**

We commit to using energy-efficient technologies and practices in all aspects of our interior construction projects.

We will prioritize the use of energy-efficient lighting systems, HVAC systems, and appliances in the spaces we design and construct.

We will encourage the use of renewable energy sources wherever feasible, such as solar power, to minimize our carbon footprint.

# **Material Selection:**

We will prioritize the use of sustainable and eco-friendly materials in our interior construction projects.

We will promote the use of recycled or reclaimed materials whenever possible.

We will source materials locally to reduce transportation emissions and support the local economy.

We will consider the entire lifecycle of materials, including their production, use, and disposal, to minimize environmental impact.

## Waste Management:

We will implement effective waste management practices on our construction sites.

We will strive to minimize construction waste by reducing, reusing, and recycling materials.

We will collaborate with waste management companies to ensure proper disposal of construction waste in an environmentally responsible manner.

# Indoor Air Quality:

We will prioritize indoor air quality in our interior construction projects.

We will use low-emission materials and finishes to minimize the release of volatile organic compounds (VOCs) and other harmful pollutants.

We will ensure proper ventilation and air circulation to maintain a healthy and comfortable indoor environment.

## Water Conservation:

We will promote water conservation in our interior construction projects.

We will install water-efficient fixtures and appliances, such as low-flow toilets and faucets, to reduce water consumption.

We will implement strategies to capture and reuse rainwater for non-potable purposes, such as irrigation and flushing.

## **Environmental Awareness:**

We will educate our employees, subcontractors, and clients about the importance of environmental sustainability in interior construction.

We will encourage environmentally responsible behaviors and practices throughout the company.

We will stay informed about the latest developments and innovations in sustainable construction and strive to incorporate them into our projects.

## **Continuous Improvement:**

We will regularly monitor and evaluate our environmental performance to identify areas for improvement.

We will set goals and targets to reduce our environmental impact over time.

We will engage in ongoing research and development to explore new technologies and practices that promote sustainability in interior construction.

Remember, this is just a suggested policy framework, and you can customize it to align with the specific needs and goals of your interior construction company in Dubai.
