

MICROTOPPING

CHIC. CONTEMPORARY. CLASSY

MICRO TOPPING

Microtopping is an innovative solution that combines the aesthetic qualities of concrete with the modern requirements of a smart and green space.

Microtopping is perfect for anyone who is looking for a unique and elegant finish, a continuous and extremely solid surface that can give any space depth, light and harmony, all at the same time. Microtopping was originally used as a replacement for concrete because of its many advantages:

it can be applied at reduced thicknesses, adheres firmly to the underlying surface and is simple and quick to install. Now it can be adapted beautifully to any environment, bestowing an original and unrepeatable touch as it is laid by hand by expert craftsmen.

It is a thin coating for renovating and resurfacing of almost any type of flooring, walls and even furniture or joinery. It provides either cloudy or marble look and has a variety of natural colors.

A versatile solution that transforms your space into a unique work of art with minimal impact.
